RE: TEP rate increase and Energy Efficiency  
#E-01933A-11-0055

I am a customer of Tucson Electric Power Company.

I am tired of TEP spouting off on energy savings and "Bright Solutions" and then turning around and requesting rate hikes, rate increases, more subsidies, etc.

Please do not permit TEP to increase rates in any way.

If TEP needs to cut programs, trim business expenses, rearrange priorities to make business profitable - let them "clean house". That is what the rest of us have to do. Maybe they need to send some of their "evaluators" to their own "home" (TEP) instead of ours. Stop requiring more money from us for what we are not getting!

TEP, stop wasting my money!

RE: TEP rate increase and Energy Efficiency #E-01933A-11-0055

I have lived in Tucson and have been a customer of Tucson Electric Company since 1972.

I'm not against energy efficiency, but I am against all the mandates and subsidies and programs like "Bright Solutions" (see my letter copied to you dated February 22, 2012) which drive up energy costs and hit the middle class and the poorest the hardest.

Those customers who believe that fossil fuels are not "natural", even though they are made from naturally growing plant material on the earth, and that CO2 is a contaminant even though we naturally exhale it and even though it is essential for plant growth, force their political agendas on the rest of us and waste our money to subsidize meaningless expensive programs that do diddly-squat to "save the earth".

They say they are happy to spend their money on such things, but they force those of us who don't believe in their agendas and who can't afford buying new stuff, to fork over our money to fund "green" mandates and subsidies for people who can afford to get new stuff.

Please stop taking our hard-earned money to spend on expensive, unfair, and dubiously "green" mandates and subsidies. Please don't allow a rate mechanism to recoup the cost of lower power sales resulting from new energy-efficiency programs. That's like saying to the customer, "Please be more energy efficient, but when you are more energy-efficient, we'll charge you more because you aren't using as much energy!"

Your request for a 15% rate increase is unrealistic and punitive. Thank you for considering my comments.
